Monohybrid Cross Worksheet Answer Key | Homeschooldressage.com

A monohybrid cross is a breeding experiment between P generation (parental generation) organisms that differ in a single given trait. The P generation organisms are homozygous for the given trait. However, each parent possesses different alleles for that particular trait. A Punnett square may be used to predict the possible genetic outcomes of a monohybrid cross based on probability.

Monohybrid Cross: A Genetics Definition

Also, the original worksheet had blue and orange faces, but this got confusing with the letters for the blue/red/purple hair, so I changed the face color to gray to make the letters different. Monohybrid Crosses. 1. OOmpos generally have gray faces, which is caused by a dominant gene. The recessive condition results in an orange face.

Oompah Loompa Genetics - Teacher's Guide
